September 11: CBE @ TRS

September 18: MCN @ CBE

September 23: CBE @ EF

September 25: CBQ @ CBE

September 30: JFK @ CBE

Fall Assessments Complete: Now What?

We've recently completed our beginning-of-year assessments, including DnA and Aimsweb testing for all students. We want to share how these assessments help us support your child's learning journey and how you can reinforce these skills at home.

Why These Assessments Matter:

The DnA and Aimsweb assessments are not traditional "tests" with pass/fail grades. Instead, they give our teachers valuable information about:

- Your child's current skills in reading and math
- Specific areas where your child excels
- Skills that may need additional support
- How to group students for targeted instruction

These assessments allow us to personalize learning for your child rather than using a one-size-fits-all approach. Teachers use this data to create small groups, select appropriate materials, and determine which concepts need more focus in the classroom.

Supporting Learning at Home

You can reinforce what we're doing at school with these simple activities:

For Reading:

- Read with your child for 15-20 minutes daily
- Ask questions about stories: "What do you think will happen next?" or "Why did the character make that choice?"
- Play word games during car rides or while waiting in line
- Point out words on signs, menus, and packages during everyday activities (continue to next page)

Message from the Principal

Parents and Guardians,

Your child's consistent attendance is the foundation of their academic success, especially as we dive into our exciting fall activities and programs. With September underway, we have even more exciting opportunities and events happening here at CBE that your children won't want to miss! Please don't hesitate to reach out to us with any questions or concerns—we value our partnership with you and are committed to your child's growth and achievement this school year.

– Dr. Anna Pagatpatan Aranda

Cont. from page 1

Fall Assessments Complete...

For Math:

- Practice counting objects during daily routines (cereal pieces, stairs, cars)
- Look for patterns in your home or neighborhood
- Measure ingredients while cooking together
- Play board games that involve counting, strategy, or money.

What's Next?

In the coming weeks, your child's teacher will be using these assessment results to tailor instruction to meet your child's needs. During our fall conferences, we'll share your child's specific results and our plans for supporting their growth this year.

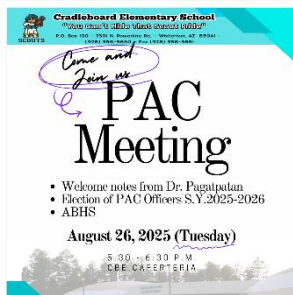

August Updates

Our school health screenings were recently completed for students, including vision, hearing, height, and weight assessments.

We are proud to announce the newly elected Student Council Officers for the School Year 2025-2026! These student leaders have officially taken their oath and are ready to serve the student body with dedication and enthusiasm.

Our first Parent Advisory Committee (PAC) meeting was held on August 26. We successfully elected our PAC officers for the 2025-2026 school year and welcomed many new parents to this important group.

Thanks to our Partnership with Native Americans, essential school supplies were successfully distributed to all our students, ensuring they have the tools needed for academic success this year.

Club & Activity Corner

Flag Football, Volleyball, Robotics

We're excited to kick off our fall sports and robotics programs for 4th and 5th graders! Congratulations to all students selected for Flag Football (Coach Mr. Cosen), Volleyball (Coach Ms. Sanchez), and our Robotics team (Ms. Collins and Ms. Denee). These extracurricular activities build important skills like teamwork, perseverance, and problem-solving while creating wonderful memories; we look forward to a fantastic season ahead!

Get Involved!

Please partner with us in your child's education by attending our monthly PAC meetings and maintaining open communication with your child's teacher through Bloomz, email, or our weekly folders; additionally, checking homework nightly and ensuring regular attendance dramatically increase your child's chances of success.
