

**Workshop Title:** Student Online Research Projects

**Objective:** To choose an appropriate Student Online Research Project to supplement your curriculum and implement in your classroom.

**Intro Activity:** Watch video of Webquests embedded in Powerpoint Module

**Presentation:** (70 minutes) Each teacher will need a copy of the Powerpoint Module *Student Online Research Projects* on their workstations.

Assist teachers in choosing their projects, and any technical problems they may have finding the Internet resources.

Note: Teachers will need to make choices as they view the presentation. This ppt has 21 hidden slides with information about the different types of projects. You will need to browse through all the different options before the workshop begins.

During the Workshop Email each participant in the class with the following reminder:

Dear Participant in the Student Online Research Projects Workshop:

This is a reminder that you must reply to this email in 7 days in order to receive your certificate for this workshop.

In your reply you need to include the following:

The title, grade level, subject matter, and the Internet address (URL) of the project you will use in your classroom.

Please also specify whether you would like me to email your certificate or send it by district mail.

Thank You,

**Practice Activity:** Teachers will search the resources in the module to find the appropriate project for their classrooms.

**Assessment:** Email your trainer with the title, grade level, subject matter, and the Internet address (URL) of the project you will use in your classroom.
